

OVERCOME THE DISTRACTIONS OF EVERYDAY DRIVING

TAKE A SPIN BEHIND *OUR* WHEEL

EXPERIENCE THE AAA DRIVING SIMULATOR.

As a public service to schools and community organizations, these state-of-the-art units are available for presentations and events to help raise awareness among pre-permit and recently licensed teen drivers on the dangers of texting and other distraction.

Presentations and simulator demonstrations are conducted by AAA Traffic Safety representatives or our trained law enforcement partners.

Each simulator unit sets up on a minimum 4' x 2' table, with a maximum edge width of 1 inch, and requires access to one standard electrical outlet. Unit must be set up indoors, in a climate controlled environment. Simulators can be hooked up to a projector for auditorium presentations.

To schedule a distracted driving presentation, please contact:
